Subject: RE: Merck / Alpine compliments

I can reiterate Mitch's comment.

I thought the field personnel throughout the project, especially Evan, were extremely instrumental in the project's overall success. Merck is not an easy place to work and is very demanding for logistics, safety, and overall construction activities. When asked to do something above normal circumstances in regards to safety or activities, I never received any resistance and you guys worked through and with all our request. I can't even say that happens with contractors who've been here for years!

Overall, I thought your team performed exceptionally well and the finished product looks great. Thanks for the help,

Cory Zepp
