We are very pleased with the transformation our building has undergone thanks to Alpine Painting. Our Warehouse/Office was in desperate need of painting. We had peeling on most of the exterior walls at our facility, much of which was down to the bare block. We hired Alpine Painting to power wash, scrape, caulk and paint our building to bring it back to life. Our building now looks like new! Alpine's project manager Ed stopped in during the project to make sure we were on schedule. The Supervisor Augusto was very professional and kept me informed on when to move vehicles and he was great about working around our normal business flow. We did have one issue where the second to last day of the job a strong wind blew over spray on four cars. We called up the sales person, Dave and he had a professional detailer out to our building the next day to remove the paint and he waxed the cars. Overall, I am very happy we chose Alpine Painting. They were very professional, they paid attention to detail and their communication throughout the project was great. I would recommend them to others and use them again in the future.
